MaximEyes EHR HL7 Integrated Systems

MaximEyes by First Insight's Electronic Health Records (EHR) software successfully passed IHE Eye Care interoperability testing and integrates with the following Practice Management Software (PMS) systems, Picture Archive and Communication System (PACS), and Imaging System vendors using HL7 standard.

MaximEyes EHR will easily integrate with any PMS or PACS systems that supports HL7 standard.

System Name	Messages Supported	Description
Nextech PMS	ADT (Inbound)	Imports and updates full patient demographics
	SIU (Inbound)	Imports and updates appointments and check-in status notifications
Ifa EMR	ADT (Inbound)	Imports and updates full patient demographics
	SIU (Inbound)	Imports and updates appointments and check-in status notifications
Compulink	ADT (Inbound)	Imports and updates full patient demographics
	SIU (Inbound)	Imports and updates appointments and check-in status notifications
Medflow EHR	ADT (Outbound)	Exports and updates full patient demographics
EyeMD EMR	ADT (Outbound)	Exports and updates full patient demographics
AKAMAI PM	ADT (Inbound)	Imports and updates full patient demographics
	SIU (Inbound)	Imports and updates appointments and check-in status notifications
	DFT (Outbound)	Exports detailed billing information along with patient demographics
Carl Zeiss Meditec FORUM	ADT (Outbound)	Exports and updates full patient demographics
	ORM/OMG (Outbound)	Generate orders and schedules procedures (exams) that requires in image management
Medical Communications HEYEX	ORM/OMG (Outbound)	Generate orders and schedules procedures (exams) that requires in Image management
Topcon Medical Systems Synergy	ADT (Outbound)	Exports and updates full patient demographics
	ORM (Outbound)	Generate orders and schedules procedures (exams) that requires in image management
